Oh What A Year...

We are coming to the end of our first year of business, and oh what a year we have had. There have been many lessons learned, and many yet to learn.

As many of you know we are operating out of a small kitchen. There are plans to move downstairs and build out a bigger kitchen. Until cost of goods for construction and appliances level out, we have decided to continue to provide to the best of our ability out of what we have. The owners do not want to raise the prices to cover this. We appreciate your patience as we produce as much food as time and our kitchen will allow.

We are not immune to the employment shortage that is affecting everyone. Thank you for understanding that our staff is working to give you the best possible service.

We have some exciting plans when things align. We want The Muse on Cedar Creek to be the destination for fun, good wine and food, and a relaxing atmosphere.

We strive to make each day the best experience for you, unfortunately we can at times fall short. For that we apologize. Please know it is not intentional, and we will continue to work to improve. - Josh & Dan
